

# DRAINING DITCH ELEMENTS

Ditch elements in draining concrete to optimize infiltration. Allows a natural vegetation.

## ACCESSORIES AND TOTAL SOLUTIONS

- Available in V-shape : with slope 2/4 or 4/4.

## ADVANTAGES

- Perfect water infiltration! Limited ecological impact.
- A high level of placement efficiency due to the standard length of 3m.
- Efficient placement due to spherical head anchors.
- The curing in the mould guarantees dimensional stability.
- Overgrowth of the complete element is possible.
- Drainage openings no longer need to be filled with loose material.

## DIMENSIONS OF STANDARD ELEMENTS

Type Bottom width / Height / Top width cm	Slope	Length cm	Weight kg
50/50/100	2/4	300	1225
50/80/130	2/4	300	1575
50/50/150	4/4	300	1315

*Note: detailed drawings of all models are available.*
